## GRAPHISTUDIO

### The Wedding Book

The Graphistudio Wedding Book is the ultimate in wedding photography presentation. This is the most comprehensive service we offer where we start at the home of the bride and stay with the wedding until the first dance. We take a selection of traditional and reportage photographs on the day, capturing not only the atmosphere of the wedding day itself but also creating some memorable images of yourselves and your guests.

In the month preceding the wedding we arrange a pre-wedding discussion, usually at our at studio, where we will note any specific requirements you have and endeavour to carry these out on the day. We outline our plans for the day based on your needs.

Following the wedding we will produce a wedding binder, which is yours to keep, containing all acceptable images. It is from this collection you make your wedding book selection. (You may have these images on a CD to view on a computer also plus online at our website.)

Each book is designed specifically for you. You select the images then we will create the book design based our wedding album meeting. Once the design is complete you will be sent a PDF file showing how your finished book will look. Then the printing process begins.

Package includes:
